SIVA BALAJI

Bengaluru, India | 9600395073 | siva06balaji@gmail.com

SUMMARY

Computer Science graduate with practical experience in SQL, RDBMS, and OOPS-based backend development. Built database-driven applications with normalized schema design and deployed a live web system on cloud platform. Strong analytical and problem-solving skills with Linux environment familiarity. Eager to contribute to backend systems and infrastructure-level application support

TECHNICAL SKILLS

Programming : Python – Object-Oriented Programming
Database : SQL, RDBMS Concepts, Joins, Subqueries
Operating Systems : Linux / Unix (Basic Commands, File Handling, Permissions)

SOFT SKILLS

Team Player with Collaborative Mindset
Attention to Detail
Effective Communication Skills
Proactive and Self-Motivated

PROJECTS

Traffic Violation Management System (Live Project)

- **Live URL:** traffic-violation-system-9s0p.onrender.com
- **Database Architecture:** Designed a normalized schema (1:N) for Vehicles and Violations; enforced data integrity via **Foreign Keys** and **Cascade Deletes**.
- **Backend Logic:** Developed modular **Python OOP** classes and utilized **SQLAlchemy ORM** to execute secure CRUD operations and prevent SQL injection.
- **Linux Deployment:** Managed end-to-end deployment on a **Linux-based cloud environment**, configuring production server settings and environment variables.

Employee Payroll Management System

- **Relational Schema:** Architected a 3NF normalized database; implemented **SQL Joins and Subqueries** to generate automated monthly payroll reports.
- **Modular OOP:** Applied **Inheritance and Encapsulation** in Python to handle diverse employee types and protect sensitive salary data.
- **Systems Integration:** Managed the application lifecycle in a **Linux environment**, utilizing file handling for automated logging and system permissions.

EDUCATION

Bachelor of Technology :Artificial Intelligence and Data Science
Sep 2021 –Sep 2025 | CGPA: 7.5 / 10
